

COLLEGE MINI-PROJECT PRESENTATION

CampusPilot AI

Smart Student Assistant

An intelligent student productivity platform

Presented by: [Your Name] · Department of Computer Science and Engineering · [Your College Name]

Made with GAMMA

THE STUDENT EXPERIENCE

Students manage too much across too many tools

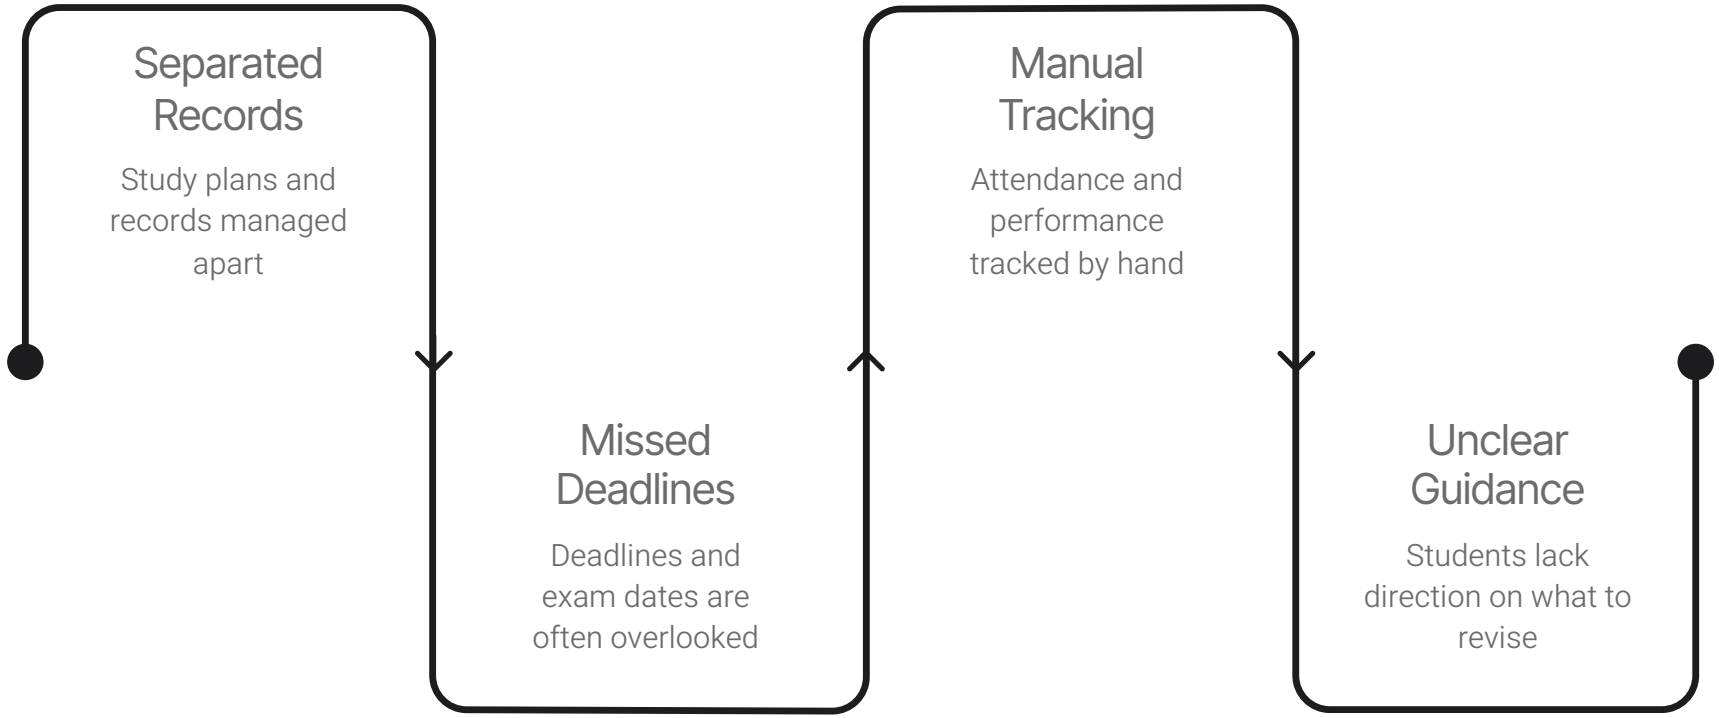

- Study planning, exams, attendance, and assignments often live in separate tools.
- CampusPilot AI brings essential student productivity tools into one web application.
- Goal: organize learning and make academic progress easier to monitor.

Made with GAMMA

THE PROBLEM

The problem is fragmented academic management

The student must connect the pieces manually.

Made with GAMMA

THE PROPOSED SOLUTION

Five objectives define the proposed solution

01

Centralize the student dashboard.

02

Simplify study planning and exam preparation.

03

Track attendance, assignments, and marks.

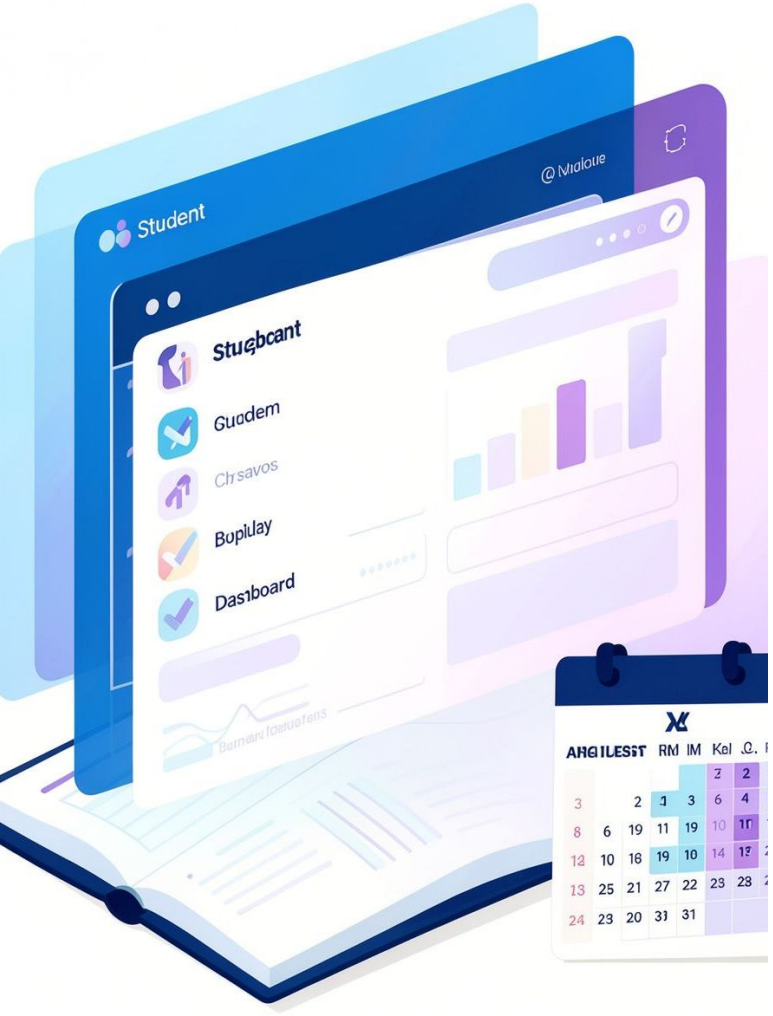

04

Offer quizzes and academic learning assistance.

05

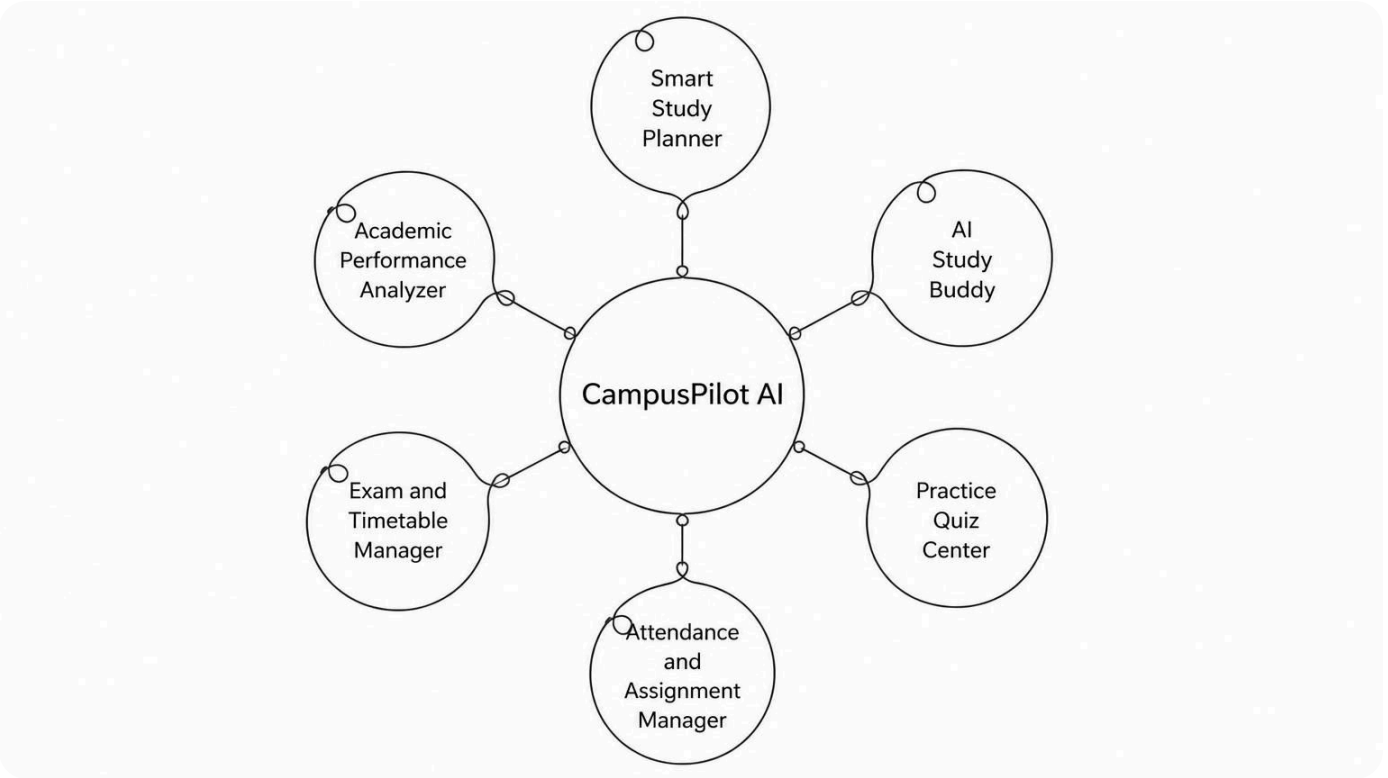

Generate personalized study recommendations from available student data.

Made with GAMMA

THE PLATFORM

One platform connects six academic modules

Made with GAMMA

KEY FEATURES

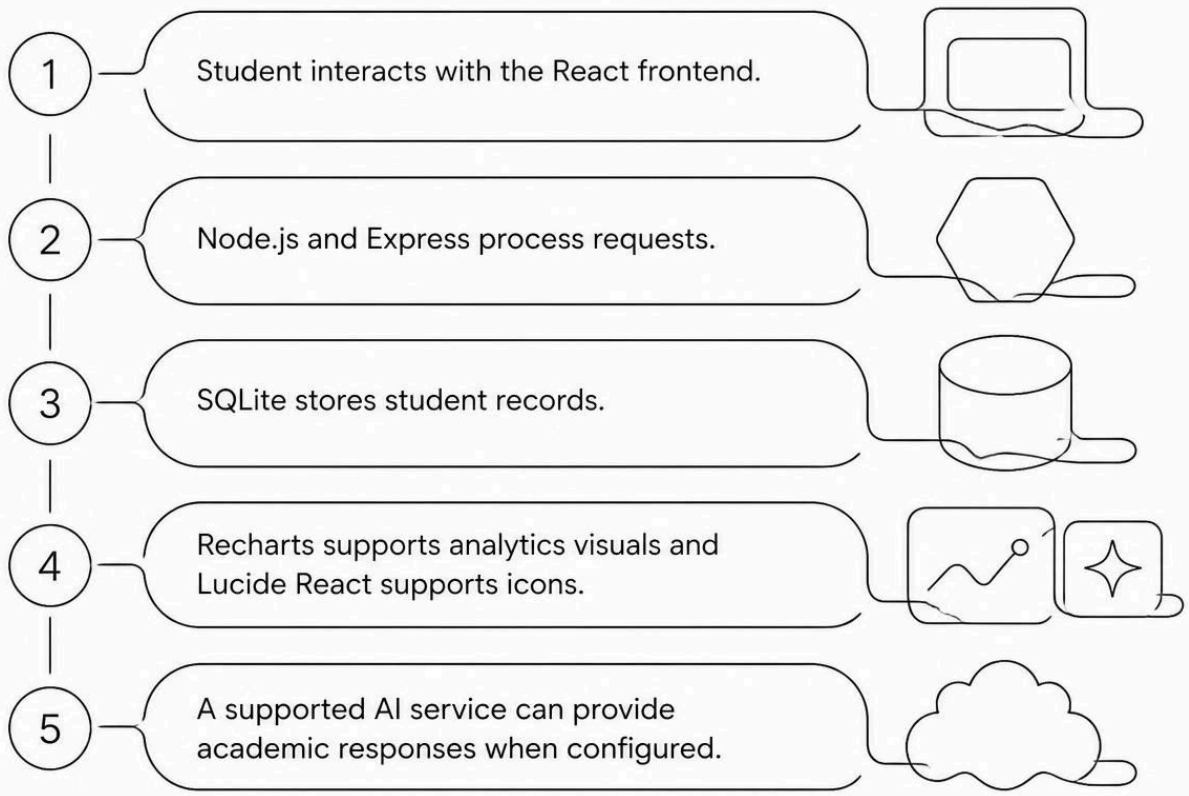

The dashboard turns daily activity into visible progress

- Upcoming exams and pending tasks at a glance.
- Daily and weekly study plans.
- Subject-wise attendance calculations.
- MCQ quizzes with scores and explanations.
- Marks tracking, performance charts, notes, achievements, and a focus timer.

Made with GAMMA

TECHNICAL ARCHITECTURE

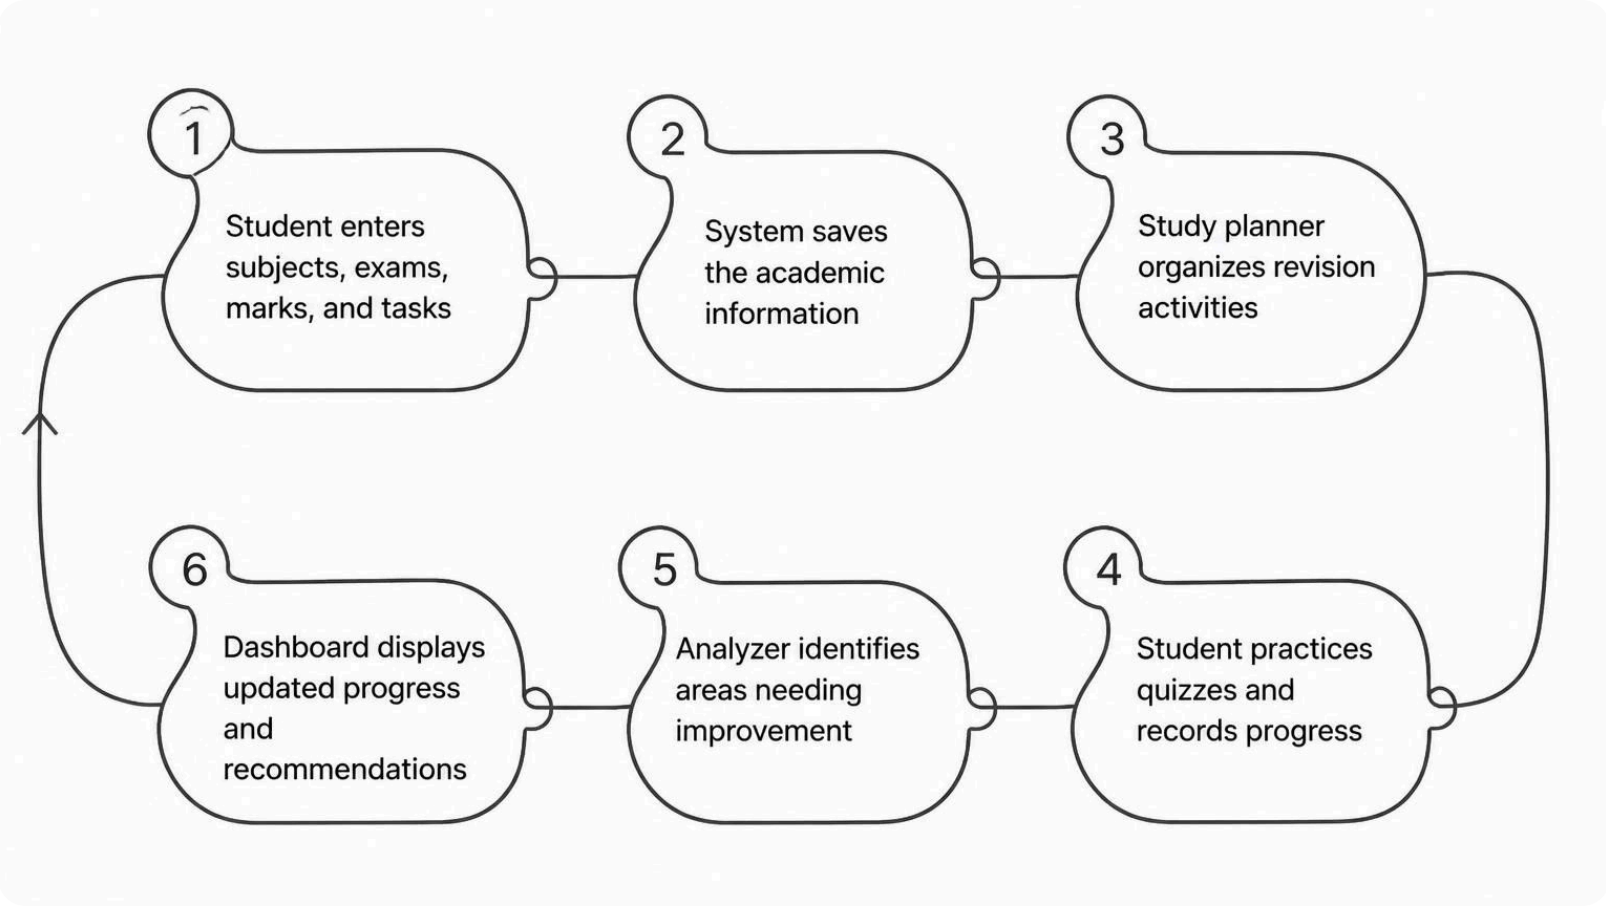

A modular stack keeps the system easy to extend

Made with GAMMA

HOW IT WORKS

The workflow closes the loop from input to recommendation

Made with GAMMA

VALUE AND DIRECTION

Benefits today, stronger learning support tomorrow

Benefits

- Centralized academic management
- Better organization of study time
- Attendance and deadline tracking
- Quiz practice and progress monitoring
- Personalized revision suggestions

Future enhancements

- Advanced AI study recommendations
- Document upload and note summarization
- Calendar and reminder integrations
- Faculty features and collaborative study groups

CAMPUSPILOT AI

CampusPilot AI brings the student journey into one place

CampusPilot AI combines planning, learning, practice, and progress tracking in one proposed platform.

Its modular design supports future improvements and AI integration.

PLAN → LEARN → PRACTICE → TRACK PROGRESS
